EDUCATION

Bachelor of Science in Computer Science, Minor in Business Administration,

Rochester Institute of Technology

Presidential Scholar | Residential Scholar

Dean's List: Fall 2024 – Spring 2026

GPA: 3.99

Exp. 12/2027 or 05/2028

Rochester, NY

SKILLS

Languages/Frameworks

Java, JavaScript, TypeScript, Python, SQL, C, ReactJS, AngularJS, C#, PostgreSQL, Java Spring Boot, Rust, PyTorch, OpenCV

Tools

Visual Studio Code, IntelliJ IDEA, DataGrip, GitHub, Microsoft Excel, Power BI, Git, Linux, Neovim, AWS, Godot, Figma

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Liberty Mutual Insurance

- Automating Dependabot security remediation via **GitHub Actions** workflows that run security checks, open fix PRs, and auto-approve and merge on success
- Published custom workflows to company wide workflows repository
- Implementing **Java Spring Boot** logic to delete unnecessary database records reducing query times by 95%

05/2026 – Present

Portsmouth, NH

Theory Tutor, Rochester Institute of Technology

- Tutored 10+ students weekly on core Computer Science concepts, including Big O analysis and recursion
- Guided students through technical whiteboarding sessions for complex algorithms
- Simplified abstract algorithms into visual diagrams and pseudocode to help students bridge the gap between theory and code

02/2026 – 05/2026

Rochester, NY

PROJECTS

Line Shift (Python | FastAPI | scikit-learn | React | Supabase), Personal Project

- Building a sports betting analytics app that trains a **scikit-learn** win-probability model on MLB data.
- Engineering a resilient data pipeline, adding retry/backoff logic and streaming writes to survive upstream API and network failures.

07/2026 – Present

Quiz Race (React | Firebase | Tailwind CSS), Hack.COMS 2025 Hackathon

- Led a team of 4 developers in creating an AI powered multiplayer quiz game to help students study
- Implemented **Firebase** for custom-token authentication and real-time data sync, enabling multiple players to join a lobby and race through the same quiz session
- Integrated the **OpenRouter API** with **Google Gemini** to transform uploaded material into question sets

11/2025

PacQuack (Godot | C#), Personal Project

- Developed a Pacman-inspired game with a duck theme for the Quackbox gaming console
- Programmed **C#** scripts to control Ghost AI behavior and Pacman movement
- Showcased the game at the Imagine RIT festival, attracting 100+ players

09/2024 – 04/2025

Sports IQ Showdown (HTML | JavaScript | CSS | Python | Flask | MongoDB), BrickHacks 11 Hackathon

- Designed a real-time trivia web application, integrating a **trivia API** to generate dynamic questions
- Implemented a scoring system that evaluates users based on accuracy and response time
- Built a leaderboard system with a **Flask API** to store top scores in a **MongoDB** database

02/2025

Teach Me (ReactJS | Bootstrap | NodeJS | ExpressJS | SQL), Hack.COMS 2024 Hackathon

- Collaborated with 2 team members to design and develop the website
- Constructed an **ExpressJS** and **SQL** backend that communicates with a **MySQL** database to access user credentials and information

11/2024

ORGANIZATIONS

Computing Organization for Multicultural Students (COMS), Active Member, Academic Mentor

- Mentored 10+ underclassmen on academic planning, helping them navigate rigorous course loads and balance technical projects
- Conducted weekly 1-on-1 meetings with mentees to provide technical guidance and academic support

08/2024 – Present

Tennis Club, Active Member

08/2024 – Present
